The Specialist in Livestock Drinking Solutions

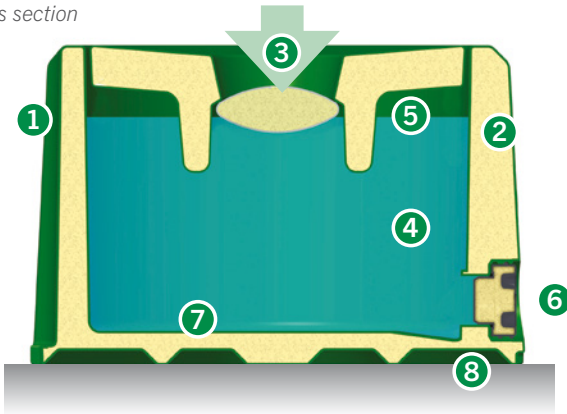

## ISOTHERMAL TROUGH ISOBAR 250

The ideal FROST-FREE drinking solution for places without running water and without electricity

Cross section

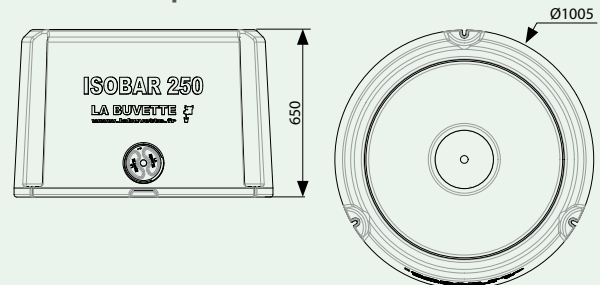

MAXIMUM WATER VOLUME: 250 litres  
USEFUL WATER VOLUME (WITH COVER): 180 litres

- 1 Made of UV-resistant, food-safe HDPE.
- 2 Anti-freeze protection down to -15 °C guaranteed by polyethylene-foam filled double wall.
- 3 The horse easily pushes against the disc in the middle of the floating cover in order to drink.
- 4 Water reserve for 1 week for one horse (in winter).
- 5 Hygiene: The water is protected from the sun, wild animals, autumn leaves...
- 6 Ø100 mm large drain with insulating plug.
- 7 Inside design without nooks and crannies for quick cleaning. The floating cover can be removed without tools.
- 8 Compact and easy to transport by one single person by means of handholds moulded under the tank.

### How does it work?

- ▶ The cylindrical tank is closed by a floating cover that rises and falls with the water level in the tank.
- ▶ To access the water, the animal pushes against the disc that very easily gives way and moves back into place afterwards.
- ▶ The unit is made isothermal by injection of insulating foam in the double wall.
- ▶ The water is frost proof in winter down to -15 °C and stays clean and cool in summer.

### Technical Specifications

To be installed on a stable and flat surface.  
It is possible to anchor the trough to the floor (optional).
